Pocket Book : 960 pages

Item Weight : 14.7 ounces

Dimensions : 4.33 x 1.57 x 7.09 inches

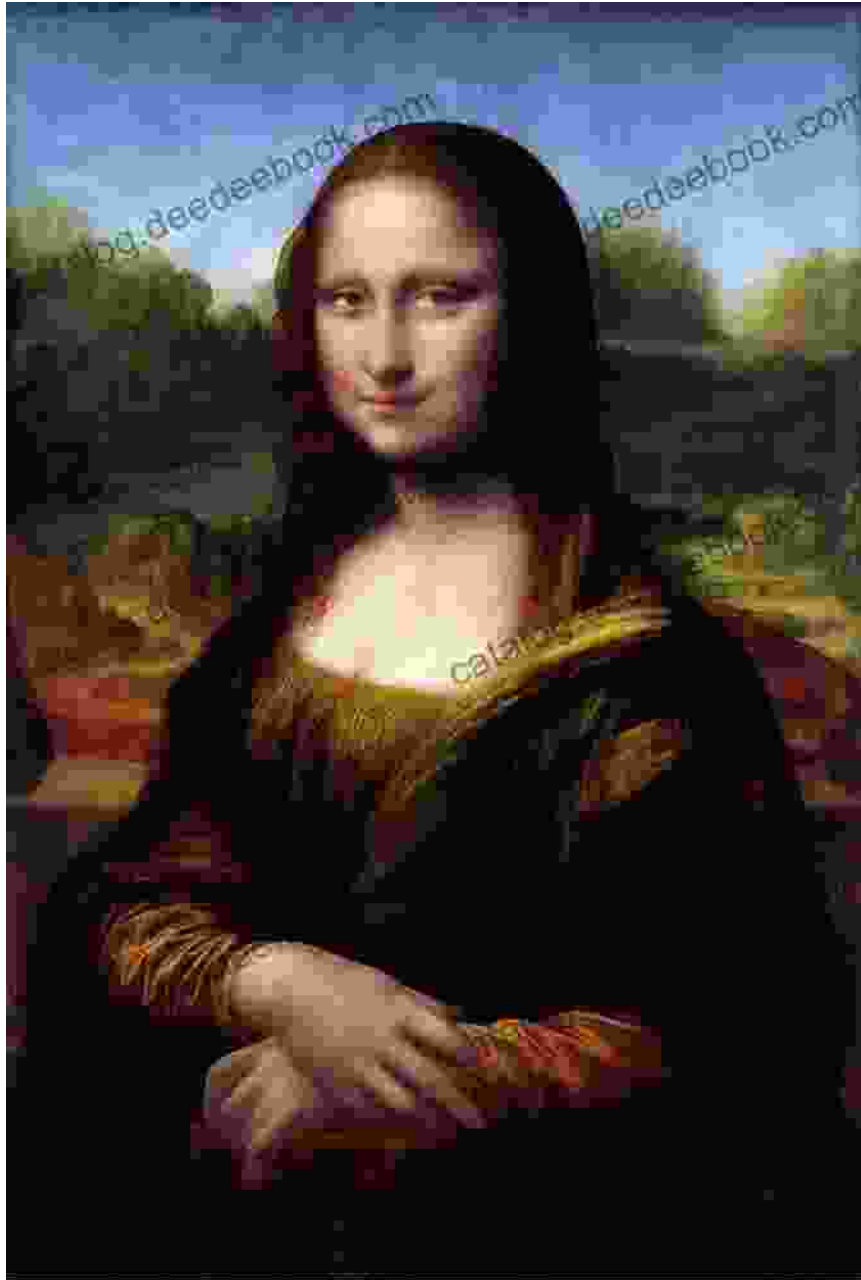

Welcome to a world of wonders, where knowledge is king and curiosity reigns supreme. Get ready to embark on an intellectual adventure as we unveil a treasure trove of surprising and captivating facts that will ignite your mind.

Delve into the Depths of History

- The Great Wall of China is not visible from space with the naked eye. (Despite popular belief, it's too narrow to be seen from orbit.)

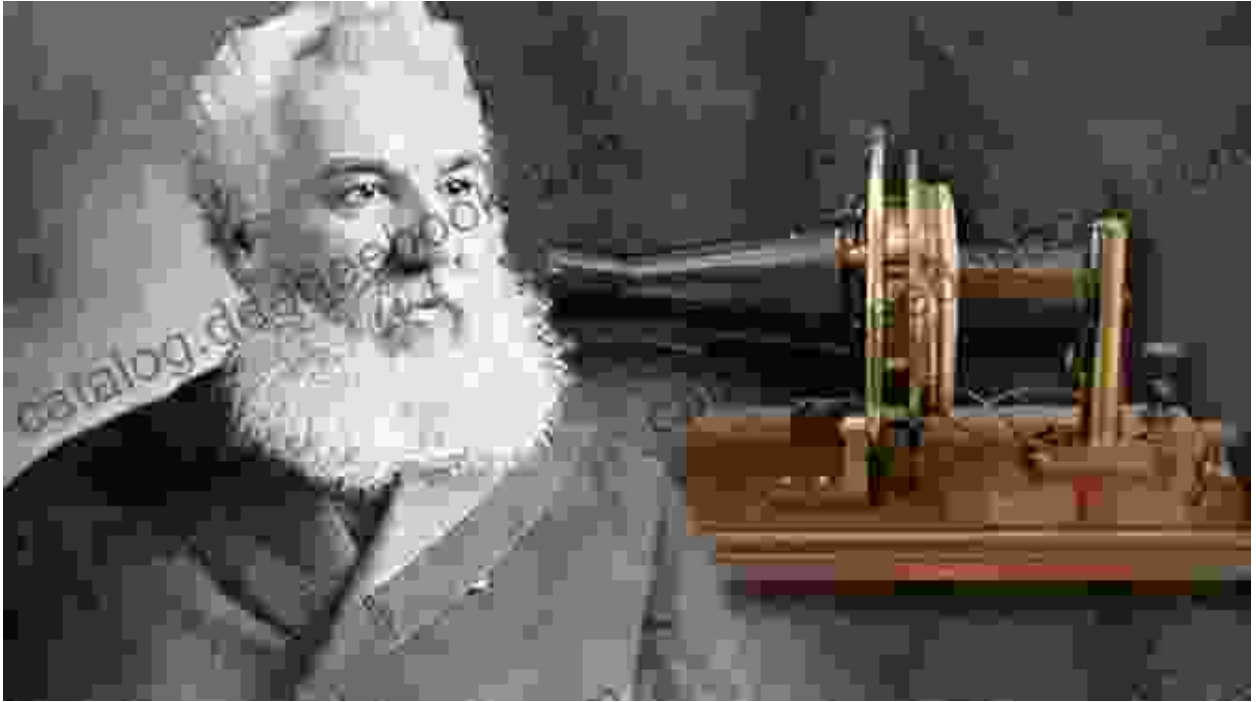

- The Mona Lisa has no eyebrows. (Art experts believe they faded over time due to age and restoration.)

- The first telephone call was not "Watson, come here!" but "Mr. Watson, come here!" (Alexander Graham Bell's assistant's name was Thomas

Watson.)

- The Titanic sank on its maiden voyage not because it hit an iceberg, but because it hit an ice floe. (The iceberg was just the tip of the floe.)

- The first computer programmer was a woman. (Ada Lovelace, daughter of Lord Byron, wrote the first algorithm for a computing

machine.)

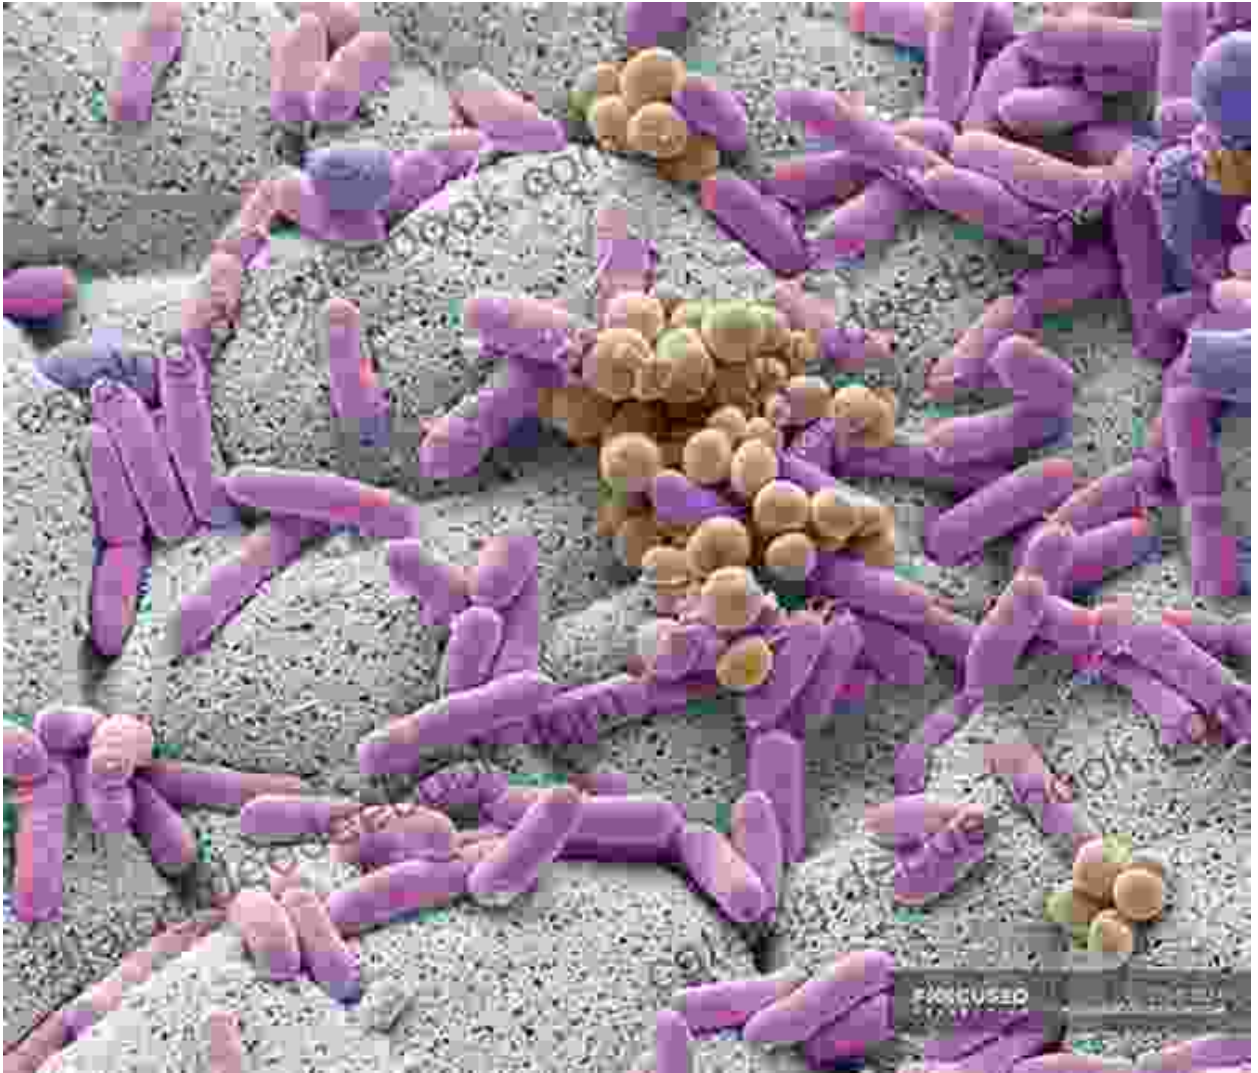

Explore the Wonders of Science

- Your brain produces enough electricity to power a small light bulb. (But don't try to hook it up, it's not that simple.)

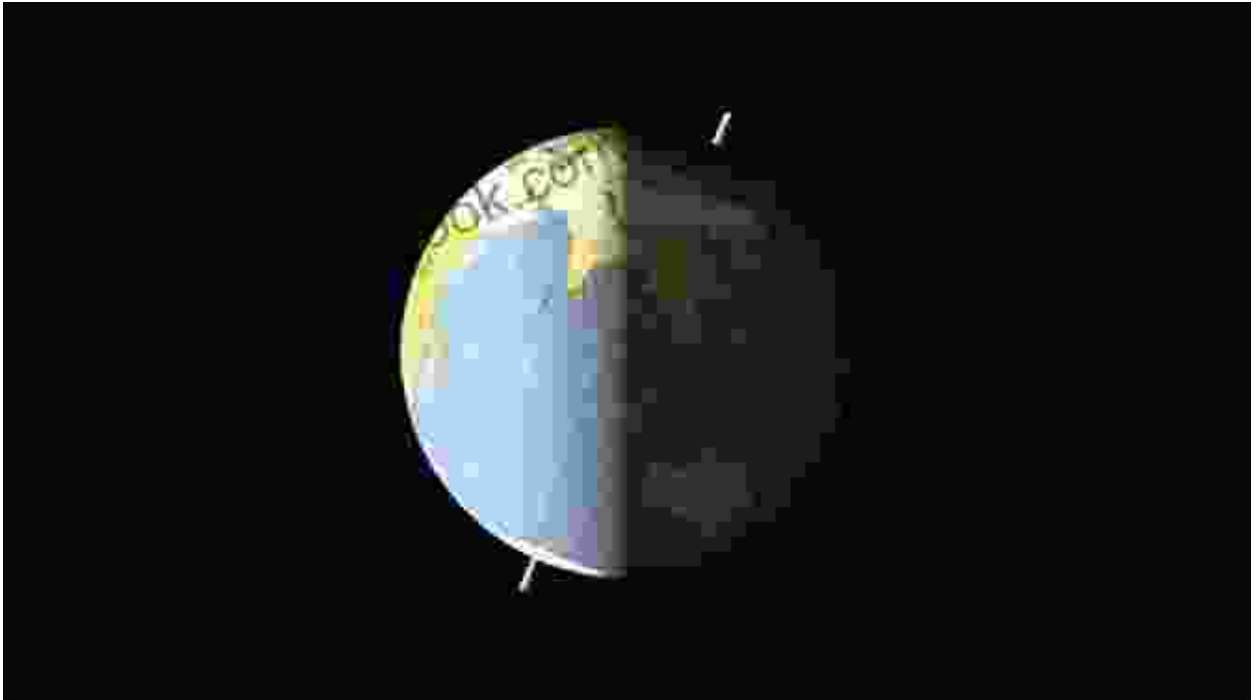

- The human body contains more bacteria than human cells. (Most of them are harmless or even beneficial.)

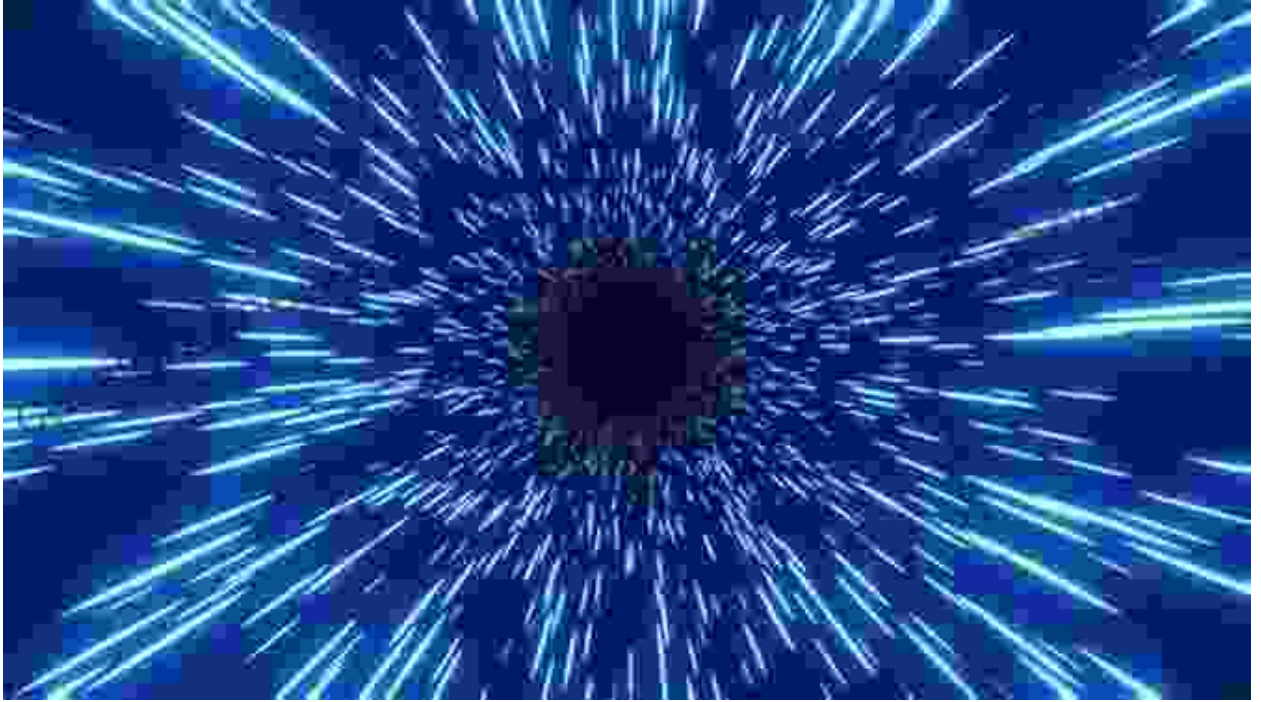

- The average person spends about 2 years of their life waiting in line. (That's a lot of wasted time!)

- The Earth's rotation is gradually slowing down. (It takes about 1.7 milliseconds longer each century.)

- The speed of light is so fast that it would take 8 minutes to travel around the Earth's equator. (That's really fast!)

Uncover the Curiosities of Nature

- Slugs have four noses. (They're located on the tips of their tentacles.)

- Dolphins can call each other out by name by whistling. (They have their own unique signature whistles.)

- The world's smallest mammal is the bumblebee bat. (It's only about the size of a bumblebee.)

- The Amazon rainforest produces 20% of the world's oxygen. (It's often called the "lungs of the planet".)

- The Great Barrier Reef is the largest living structure on Earth. (It's made up of billions of tiny coral polyps.)

Witness the Oddities of Human Behavior

- Most people are right-handed. (About 90% of the world's population.)

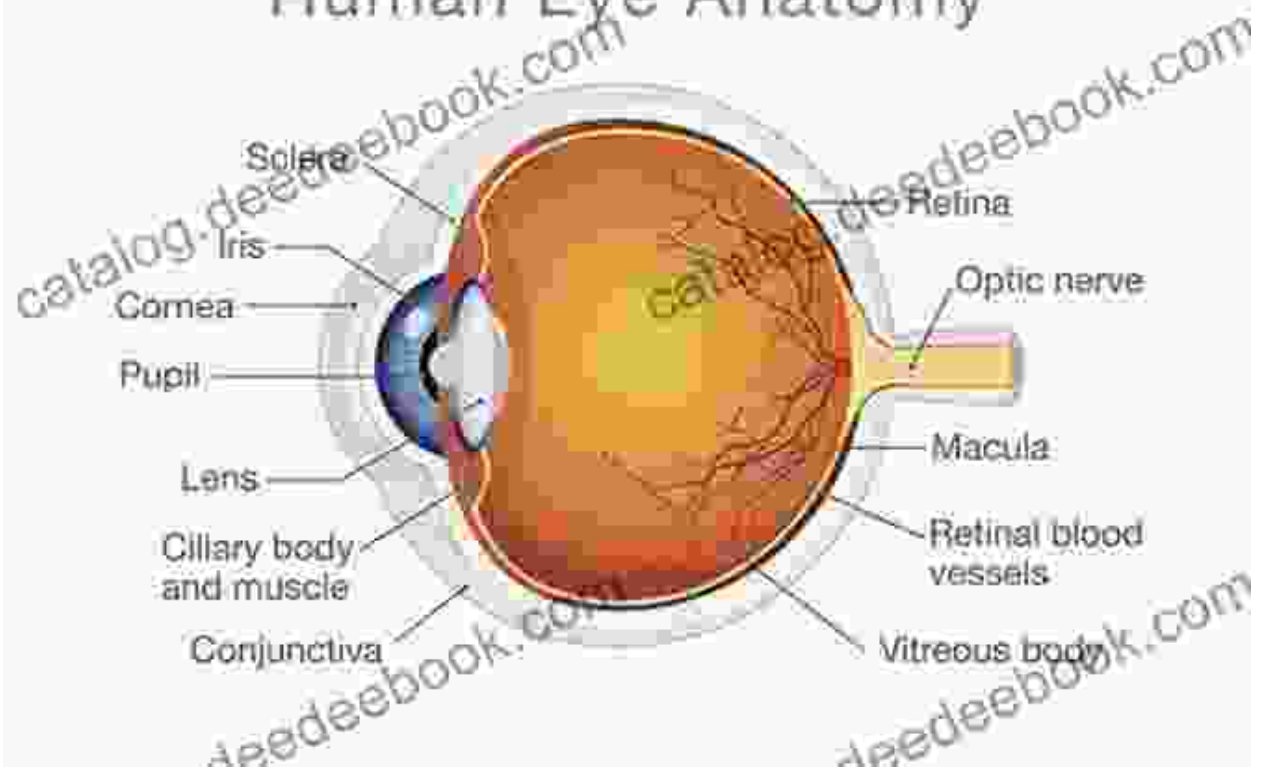

- The average person laughs about 15 times a day. (Laughter is a great way to reduce stress.)

- The human eye can see more colors than a camera. (We can see about 10 million colors.)

Human Eye Anatomy

- The average person spends about 5 hours a day on their phone. (That's a lot of time on social media!)

- Humans are the only animals that can blush. (It's a way of expressing embarrassment or shame.)

There you have it, a mind-boggling collection of fascinating facts that will undoubtedly leave you feeling both amazed and enlightened. Share these gems of knowledge with your friends and family, and together, let's continue to explore the wonders of the world around us.
