- **Part 1: Principles of Liposuction**
- **Part 2: Preoperative Evaluation and Patient Selection**
- **Part 3: Operative Techniques**
- **Part 4: Postoperative Care**

- **Part 5: Complications**
- **Part 6: Special Considerations**

Part 1 provides an overview of the history of liposuction, the principles of the procedure, and the different types of liposuction techniques. Part 2 discusses the preoperative evaluation of patients, including the assessment of their medical history, physical examination, and psychological evaluation. Part 3 provides a detailed description of the operative techniques used in liposuction, including the different types of incisions, cannulas, and suction devices. Part 4 discusses the postoperative care of patients, including the use of compression garments, antibiotics, and pain medication. Part 5 discusses the potential complications of liposuction, including bleeding, infection, and nerve damage. Part 6 discusses special considerations for liposuction, such as the treatment of lipedema and lymphedema.

Liposuction: Principles and Practice by Melvin Shiffman is a well-written and comprehensive textbook that is essential reading for any surgeon who performs liposuction. The book is profusely illustrated with high-quality photographs and drawings, and it includes a DVD that demonstrates the operative techniques.

Liposuction: Principles and Practice by Melvin Shiffman provides the reader with a thorough understanding of the principles and techniques of liposuction surgery. The book is an invaluable resource for surgeons who want to improve their skills in liposuction and for patients who are considering undergoing the procedure.

Liposuction: Principles and Practice by Melvin Shiffman is the definitive reference on liposuction surgery. The book is a must-have for any surgeon

who performs liposuction, and it is also a valuable resource for patients who are considering undergoing the procedure.
